Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, drawn to voltage subtracter/adder circuits, classified in class 327, subclass 361.
 - II. Claims 5-13, drawn to MOS differential amplifier circuits, classified in class 327, subclass 563.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination group I as claimed does not require the particulars of the subcombination group II as claimed because the differential pair MOS transistors in the voltage subtracter/adder circuit in the combination group I does not require to be driven by a current source which is controlled such that a difference voltage between the common mode voltage and a common source voltage of the first and second MOS transistors being a constant value as required in the subcombination group II. The subcombination has separate utility such as it can be used as a MOS differential amplifier.

Art Unit: 2816

3. Further, if Applicant elects the subcombination group II, Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted. Currently, no claim is generic to the species.

Species I, Figs. 9 and 12, i.e., claims 5-8 and 12,

Species II, Fig. 15, i.e., claims 9-11 and 13.

4. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call was made to an attorney of record on 3/19/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2816

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
